A Detailed Roadmap To
A Balanced Future

The Crowd Sale

The crowd sale opens July 28th, 2016. This is the first opportunity the public will have to participate in the guidance of the future of the Tao Network!

The crowd sale shall last for 30 days and individuals have a chance to earn up to 50% bonuses on their deposits through our referral program!

The Launch

The launch of the Tao Network will begin the bootstrapping and maturation phases of the network. During this time the network will be monitered heavily for any performance or operational issues that were not revealed in testing.

The UI

The UI requires major work to incorporate the various functionality which has been added to the Tao Network from the base that is Bitcoin. The primary design focus is simplicity and usability.

The Album

Once the Tao Network has exited the bootstrapping phase it will be ready for the provision of digital assets and content. Releasing an album for consumer purchase or stream on the Tao Network is the final step in the process of bringing this technology to market in a usable form.

The Publisher

Vital to creating a system which is of use to the music industry is the participation of publishers. Publishers are the "last stop" for the management and execution of rights. A block-chain solution that does not include input from a publisher isn't really a solution.

We are working through the final stages of engaging a music publisher for complete access to their multi-platinum catalog and artists in order to build a solution that really works.

The Integration

Integrating the Tao Network into a working, profitable music publisher takes a hands-on approach. We will be working very closely with the selected publisher to build a solution which is not only cryptographically secure, but easy to use and integrate into existing business operations. This not only includes the software, but the reporting required to validate the proper execution of rights and payment of royalties.

The Marketplace

The flagship implementation of Tao Network smart contracts is the "always on" blockchain-based marketplace!

- Uncensored, unstoppable, unregulated commerce
- Securely buy and sell anything - physical or digital - with anyone, anywhere in the world
- USD Pricing
- No Credit Card Fees
- Instant Settlements
- Automated Escrow

The full power of blockchain technology, made accessible to everyone!
